EDUCATION

Game Design

Breda University of Applied Sciences

2024 – 2028 (expected)

Tristan Wijnmaalen

Systems Designer ◆ *Making every button press count*

Third-year Game Design student at Breda University of Applied Sciences. I'm most passionate about building the systems the player interacts with and making them feel good: easy to pick up, deep enough to master.

PROJECTS

Oh! Meow God.

Team of 17 · Custom engine · 8 weeks

Lead Designer

- Led design on a 17-person team and was the sole designer for the 3Cs and abilities.
- Specced and tuned a camera that grew from a trigger box into nine cooperating systems, built with a gameplay programmer.
- Shipped in an itch.io early access build with six updates, over 1,000 views and over 150 downloads.

Character & Controls · Camera · UI · Design Leadership

Custom Tech/Skill Tree Editor

Solo · Unreal Engine 5 · 8 weeks

Systems Designer

- Designed and built an editor for building skill and tech trees visually, with a runtime component and a generated UI.
- Modeled the controls on Unreal's Blueprint graph: panning, zoom, box selection and undo.
- Wrote a peer-reviewed how-to document that walks through the full pipeline.

Tool Design · Technical Implementation · Functional UI

OTHER PROJECTS

Bedlam

Solo Developer · Unreal Engine 5 · 8 weeks

A twin stick shooter where you rack up a giant streak amidst increasing bedlam.

Ability & Combat Design · Enemy Design · Scoring & Streak Systems

Drat!

Vision Holder · Team of 8 · Unreal Engine 5 · 8 weeks

A momentum-based game where you run around as a rat stuck in a ball. I pitched the concept, got it chosen and led it through development.

Concepting · Camera · Movement
